Re: Comments

Ladies and Gentlemen:

Glades Media Company LLP (Glades) urges the Commission to adopt rules and procedures to expand AM use of FM translators and to insure that such translators are available to AM stations seeking to serve their principal communities at night. Glades' AM station WOKC, Okeechobee, Florida, is rebroadcast over the facilities of an FM translator station. This arrangement has greatly contributed to the station's ability to serve Okeechobee. It has bolstered the financial viability of WOKC and materially contributed to the continued availability of a local radio service in Okeechobee. As a full service radio station WOKC programs to meet the needs of its service area and is available to meet emergency needs in a rural area subject to severe weather. The rebroadcast of WOKC on an FM translator has greatly assisted WOKC's programming efforts and any FCC effort aimed at increasing the availability of FM translators for AM rebroadcasting will result in similar public interest benefits.

Sincerely yours,

Glades Media Company LLC
